

MEASURING 19TH CENTURY NEW YORK STATE: BOOKSIGNING AND LECTURE

3:30-6 pm, Sep 27, 2013

[Onondaga Historical Association Museum](#)

OHA will be hosting a lecture and booksigning by Marguerite Holloway, author of *The Measure of Manhattan: The Tumultuous Career and Surveying Legacy of John Randal, Jr.* Cartographer, Surveyor, Inventor. Randal (1787 - 1865) was an eccentric and flamboyant surveyor. Renowned for his inventiveness as well as his irascibility, Randal was central to Manhattan's development but also prepared the primary 1821 survey and map of the Salt Springs Reservation around Onondaga Lake - a key to the initial development of the Syracuse area. This program is held in conjunction with the Syracuse University Geography Department's Fall 2013 Colloquium.
